

```

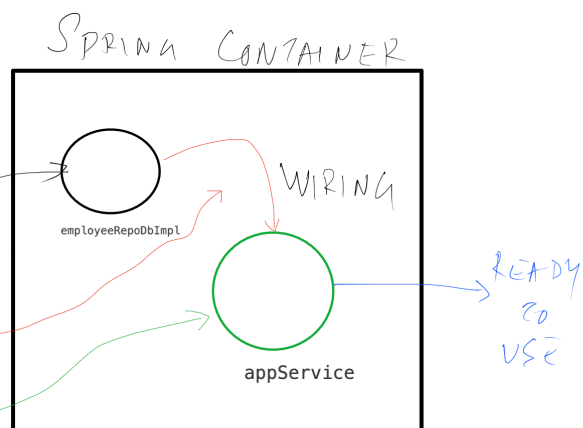

interface EmployeeRepo {
    void addEmployee(Employee e);
}

@Repository
public class EmployeeRepoDbImpl implements EmployeeRepo {
    public void addEmployee(Employee e) {
        ...
    }
}

@Service
public class AppService {
    @Autowired
    private EmployeeRepo employeeRepo; // no tight coupling

    public void doTask(Employee e) {
        employeeRepo.addEmployee(e);
    }
}

```

```

interface EmployeeRepo {
    void addEmployee(Employee e);
}

@Repository
public class EmployeeRepoDbImpl implements EmployeeRepo {
    public void addEmployee(Employee e) {
        ...
    }
}

@Service
public class AppService {
    @Autowired
    private EmployeeRepo employeeRepo; // no tight coupling

    public void doTask(Employee e) {
        employeeRepo.addEmployee(e);
    }
}

@Repository
